# What are the specifications of the 345W dual-wave solar panel

What is the thermal performance of 345W solar panels?

The thermal performance of the 345W solar panels from Q Cells ensures their reliability and efficiency across varying temperature conditions. These panels are designed to operate optimally within a wide operating temperature range of -40~85 °C.

Are 345W solar panels a good choice?

With a maximum system voltage of 1000 V and a temperature coefficient of -0.36 %/°C, these solar panels can perform optimally even in challenging weather conditions. The thermal performance of the 345W solar panels from Q Cells ensures their reliability and efficiency across varying temperature conditions.

What is mission Solar 345W solar panel?

Mission Solar 345W Solar Panel is a 60 cell module featuring class leading power output that makes it ideal for both commercial and residential systems, off-grid or grid-tie application. The Passivated Emitter Rear Contact (PERC) technology ensures excellent power output with the help of advanced cell structure.
