

# What do you need to use the batteries in the battery cabinet

---

What is a battery cabinet?

Battery cabinets are a convenient storage solution that encourages staff to maintain the correct handling and storage procedures. By charging and storing batteries in the one location, you are reducing the likelihood of batteries being lost, stolen, damaged or left in unsafe conditions (such as outdoors).

Are battery cabinets safe?

As lithium-ion batteries have been known to ignite when being recharged, it's important to have a charging station that is free from faults and electrical malfunctions. Battery cabinets are constructed to have intrinsically safe electrical work that reduces the risks associated with recharging.

Why should you have a battery cabinet?

For example, dropping a battery or leaving it in a hot location can result in irreversible damage to the battery cell, which can lead to ignition or explosion. Providing a battery cabinet can reduce these risks by encouraging safe handling and storing practices within your team.

Do I need a battery box?

Whether or not you need a battery box depends on your specific situation and the type of battery you're using. Here are some factors to consider: Battery Type: Some battery types, like lead-acid batteries, are more prone to leaks and spills. A battery box can help prevent these issues and ensure a safer environment.
