Kingspan PoweRail RW Rooftop Solar PV Mounting System Installation Guide 18 Installation Instructions  
Beginning from the lowest point of the array insert the module end clamp into the corresponding slot on the rail. The end clamp should be positioned centrally on the Kingspan PowerRail RW.

How to install a rooftop solar system?

Preparing for the installation of a rooftop solar system requires planning and calculating ahead of time. You have to calculate your annual energy consumption, assess the condition of your roof, and select a suitable solar system. It then continues by hiring a professional installer and reviewing your financing options.

What is a roof-mount solar system?

Here are a few considerations before putting your finger on one of them: A roof-mount solar system is a photovoltaic (PV) system that generates electricity through solar panels mounted on a rooftop. Owing to their easy installation and low maintenance, roof-mount solar panels are ideal for residential and commercial purposes.

Does Kingspan invest in solar?

Through the programme, Kingspan has also made significant investment in solar PV systems to increase its on-site renewable energy generation and reduce its own direct GHG emissions, with solar PV systems installed across 57% of its wholly-owned sites by the end of 2024.
