
Wholesale lv switchgear panel in Belgium

What is LV switchgear?

De-electrifying devices for secure assessment, servicing, and error clearance is also done by switchgear.

What is an LV switchgear panel? The LV switchgear panel comprises two layers of metal enclosures, permanent and disengageable, for which different electronic devices and accessories are housed.

What are low-voltage electrical distribution products?

Low-voltage electrical distribution products are products that use less than or equal to 50 volts of electricity.

The most common voltages are 12 V, 28 V, or 48 V. Some common examples of low-voltage electrical distribution products are doorbells, landscape lights, and security sensors.

Who is SGC - switchgear company?

SGC is an independent manufacturer of medium voltage switchgear solutions worldwide. We have more than 45 years worth of experience in the development and production of medium voltage cubicles from 1 kV to 24 kV, for both indoor and outdoor applications. SGC - SwitchGear Company provides reliable products for electrical distribution applications.

Where are switchgears made?

Each and every switchgear is built in this single factory in Belgium and our engineers are literally just one feet away from the production floor. Supervisors and managers are out on the floor. When a change needs to happen, they can be on the assembly line instantly implementing those changes.
